## DOLOPRIL®

A finely ground dolomitic lime (magnesium carbonate and calcium carbonate) formed into a granule for fast and easy application in any spreader to sweeten acidic soils in weeks instead of months or years. Improves water penetration.

This product is designed for the soil of lawns, turf, gardens, potting medias, and shrubs that are primarily deficient in magnesium. It also supplies a high level of calcium and together they help to adjust soil pH for increased root growth and plant development.
