### SECTION 3: HAZARDS IDENTIFICATION

#### Emergency Overview

Routes of Entry: Skin, eyes, inhalation

Acute Health Effects: Eyes: Solid particles are likely irritating as "foreign objects". Some tearing, blinking and mild temporary pain may occur as the solid material is rinsed from the eye(s) by tears.

Skin: Dusts and mists are not expected to be irritating based upon PH.

Ingestion: Ingestion in very large amounts may cause nausea and vomiting. Ingestion is not a typical route of occupational exposure.

Inhalation: The dusts and mists from solutions may be irritating to nose and throat. High concentrations of dust may cause coughing and mild, temporary irritation.

Chronic Health Hazards: In general, long-term exposures to high concentrations of dust may cause increased mucous flow in the nose and respiratory system airways. This condition usually disappears after exposure stops.

Carcinogenicity: Not carcinogenic.

#### SECTION 4: FIRST AID MEASURES

Eyes: Do not let victim rub eyes. Immediately flush eye(s) with lukewarm water for at least 20 minutes while holding the eyelid(s) open. If irritation persists, obtain medical advice.

Skin: Flush with lukewarm water until product is removed. Obtain medical attention if pain or irritation develops or persists.

Ingestion: Not normally ingested.

Inhalation: Remove source of contamination or have victim move to fresh air. Obtain medical advice immediately.
